

## Preventative Maintenance

- An **Australian Gold®** Laser SPRAYTANS™ SYSTEM application will NOT prevent your skin from burning when exposing your skin to ultraviolet light.
- For best results, it may take up to three sessions to develop your desired color.
- Maintaining your color is possible with subsequent visits of every five-seven days.
- The length of time your tan will last depends on your skin type, the moisturizers and the frequency you tan. Healthy, hydrated skin will maintain results longer and achieve color faster.

### *Preparation:*

- Exfoliants used prior to tanning will increase the effectiveness of the tanning.
- Moisturizers must not be applied in the eight hours prior to your treatment.
- You should not use the system if you are allergic to the ingredients, a patch test will determine this if you are unsure.

### *To Prolong the Length of the Tan:*

- Allow the initial application of the tan to remain on the skin for at least six to eight hours but ideally for twenty-four hours or overnight. This will allow your **Australian Gold®** Laser SPRAYTANS™ SYSTEM tan to fully develop and will ensure the longest lasting results.
- Avoid being sprayed directly into the armpits - some people have odor reactions in this area.
- Clients should have clean, dry, exfoliated skin before being sprayed - no makeup, moisturizers and moisturizing body wash.
- Pat dry after shaving.
- Use a sharp, clean razor when shaving.
- Use **Australian Gold®** Forever After™ daily after shower.

As used on Fox Network's  
**In Hollywood... IT! SWAN™**

Currently top Hollywood stars and TV shows are using the **Australian Gold®** Laser SPRAYTANS™ SYSTEM and loving it. Both Fox Network's "The Swan™" and the make-up artist of model/actress Amanda Bynes endorse this amazing product.

## Why the Australian Gold® Laser SPRAYTANS™ SYSTEM is right for you!

1 The **Australian Gold® Laser SPRAYTANS™ SYSTEM** has redefined sunless tanning with the world's first laser targeted Spray-on Tanning System. No other system guarantees the lowest overspray, most accurate body detailing and drip free applications.

2 The **Australian Gold® Laser SPRAYTANS™ SYSTEM** uses a patented laser guided delivery system to assure a smooth, even tan without any unflattering blotches or streaks.

3 **Australian Gold® Laser SPRAYTANS™ SYSTEM Technology** allows our DHA solution to rapidly absorb with deeper penetration, providing a rich, sexy bronze color while moisturizing your skin.

4 **Australian Gold® Laser SPRAYTANS™ SYSTEM DHA Solution** (dihydroxyacetone) is a safe, simple, three carbon sugar derived from sugar beets cooked into liquid form and is FDA approved. When applied, DHA reacts with proteins and amino acids in the skin's superficial layer to form a deep golden brown color. The results are simply outstanding!

## Exclusive Features and Benefits

*Feature:* Patented Laser Spray Guide  
*Benefit:*

- Virtually eliminates overspray.
- Perfect, even applications with dye-free solution.
- Perfect for detailing abs and small areas.

*Feature:* Patent Pending Sunless Spray with Drip-Free Technology  
*Benefit:*

- Moisturizing vitamin infused solution hydrates skin and allows for fast drying.
- Contains over 70% Organic ingredients.
- Will not run, drip or streak on clients.

*Feature:* High Volume Low Pressure  
*Benefit:*

- The softest spray for comfort (under 2psi).
- Quick sessions (under 10 minutes).

## Frequently Asked Questions

*Q:* How is the **Australian Gold® Laser SPRAYTANS™ SYSTEM** tan applied?

*A:* The **Australian Gold® Laser SPRAYTANS™ SYSTEM** uses a patented laser guide to deliver a smooth, gorgeous, perfectly even tan.

*Q:* Why is the laser important?

*A:* Independent studies, including the EPA, have proven that our laser guide applicators not only spray more accurately, but also use less product. This results in lower costs and better results.

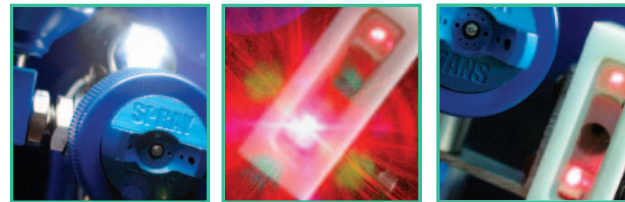

*Q:* Will my tan be instant?

*A:* **Australian Gold® Laser SPRAYTANS™ SYSTEM** offers the option of an instant bronzing formula for immediate results or a dye-free clear formula that will develop into a golden tan within a few hours.

*Q:* How long do I have to wait afterwards before I can shower?

*A:* For best results, we recommend that the **Australian Gold® Laser SPRAYTANS™ SYSTEM** solution be allowed to absorb into the skin for a minimum of five hours.

## Laser Technology

We are proud to offer the NEW **Australian Gold® Laser SPRAYTANS™ SYSTEM**. With unmatched level of accuracy, the **Australian Gold® Laser SPRAYTANS™ SYSTEM** provides a foolproof tan.

## Frequently Asked Questions

*Q:* Will my skin be orange like other self-tanning products?

*A:* No. Through scientifically advanced pH testing, our **Australian Gold® Laser SPRAYTANS™ SYSTEM** solution is uniquely formulated to virtually eliminate the “orange” effects associated with most other self-tanning products.

*Q:* Will the spray discolor my hair or clothes?

*A:* The solution does not absorb into hair but you may choose to wear a cap we provide. If you choose to be sprayed with the solution containing bronzer, there is a chance some will transfer to your clothing. The bronzer is aloe vera based and will wash off most fabric.

*Q:* What about allergic reactions?

*A:* If you are allergic to other sunless tanning products or have hypersensitive skin, we recommend checking with your physician before using the products.

*Q:* Will my DHA tan protect me from the sun?

*A:* No. You should always wear sunscreen when outdoors.
